EXPERIENCE:

November 2012 –Project Manager at PBA (Consulting company), Moscow

- In this company I am overseeing a project for an important russian customer; the project concerns the business process automation of the incoming documents for the east-european sites. The documents are scanned by a service provider and then sent back to the customer in a central site for further processing approval and registration in SAP

April 2011 –Project Manager at Stolline(Manufacturing company, www.stolline.ru), Moscow

- In this company I am in charge of the introduction of a MES (Manufacturing Execution System) and an APS (Advanced Planning System) for a thorough check of production performances and efficient material requirement planning. The project involves also a strong integration with the Erp system (1C Enterprise) and a revision of the actual business processes.

January 2009 –IT Consultant at Isis Information Systems (Software Company, www.isis-papyrus.com), Turin/Wien/Sofia/Bruxelles

- Domestic payments automatization for Bulbank Unicredit (ocr solution, with document generation and archiving). On this project I was in charge of integration between the Unicredit customer database and the database used by the Isis solution
- Reporting System of Domestic payments automatization for Bulbank Unicredit. On this project I was in charge of architecture design and the commercial proposal to the customer.
- Implementation of a CRM and Social network for a startup company. For this project I was in charge of the logistic, marketing and provision calculation modules.
