About me

Before teaching Business Management in DP, I worked for 30 years as Senior Project Manager for international companies in the manufacturing, banking and consulting sectors; I have a broad range of experiences and know how in accounting, operations, logistics and marketing. My strong characteristics are: excellent time management skills, organizational skills, stress resistance and strong orientation to the result; I welcome new challenges and I am always looking for improvements. In my year of teaching I have refined my teaching technique, allowing me to finish the DP BM curriculum in one year and a half, leaving to students 4 months for the preparation to the exams. As a DP Core Coordinator, I managed to have all the DP students complete their EEs during the first DP year; with the most motivated students I managed to also to have their CAS completed during the first DP year.

I consider efficiency and quality two non-negotiable prerequisites; thus beside by efficiency, I can say that my students have a 99% pass rate and 70% of them received grades between 5 and 7. During these years of teaching I was also able to improve my pastoral care skills; as a homeroom teacher I dealt with problematic students and I managed to improve their general behavior and to earn their respect; in one occasion, due to a temporary absence of the pastoral coordinator, I had to step in for a month, and deal with issues related to safeguarding.

Due to my previous working experience, I have consolidated skills in managing people and teams of diverse nationalities; I have an eye for business process optimization and for budget saving. During my 10 years in teaching I seldom witnessed the above mentioned skills in schools' managers, and that makes me confident to be fully able to cover roles as Headteacher or school's director.
